inetcore-25.4.jar (shaded: com.inet.shared:inetcore:null)

Description:

A blend composite defines the rule according to which a drawing primitive (known as the source) is mixed with existing graphics (know as the destination.)

ColorUtilities contains a set of tools to perform common color operations easily.

Suppressed Vulnerabilities

[CVE-2022-31160](#) suppressed

jQuery UI is a curated set of user interface interactions, effects, widgets, and themes built on top of jQuery. Versions prior to 1.13.2 are potentially vulnerable to cross-site scripting. Initializing a checkboxradio widget on an input enclosed within a label makes that parent label contents considered as the input label. Calling `.checkboxradio("refresh")` on such a widget and the initial HTML contained encoded HTML entities will make them erroneously get decoded. This can lead to potentially executing JavaScript code. The bug has been patched in jQuery UI 1.13.2. To remediate the issue, someone who can change the initial HTML can wrap all the non-input contents of the `label` in a `span`.

CWE-79 Improper Neutralization of Input During Web Page Generation ('Cross-site Scripting')

Notes: JavaDoc embedded JQuery UI - requires updated Java Version with newer javadoc
